Health

Every year I get to see my family during holiday's.
This makes me very happy

This year my holiday with my family will be different. I have to follow the Covid-19 protocol to keep myself and my family safe from germs

Before my family enters my home or, my backyard they will complete the following steps:

1. Sanitize their hands

2. Wear mask

Once my family enters my home or, my backyard they will complete the following steps:

1. Keep their mask on

2. Wave and say hello

I will enjoy opening my presents, singing holiday songs and completing activities with my family from my special seat .

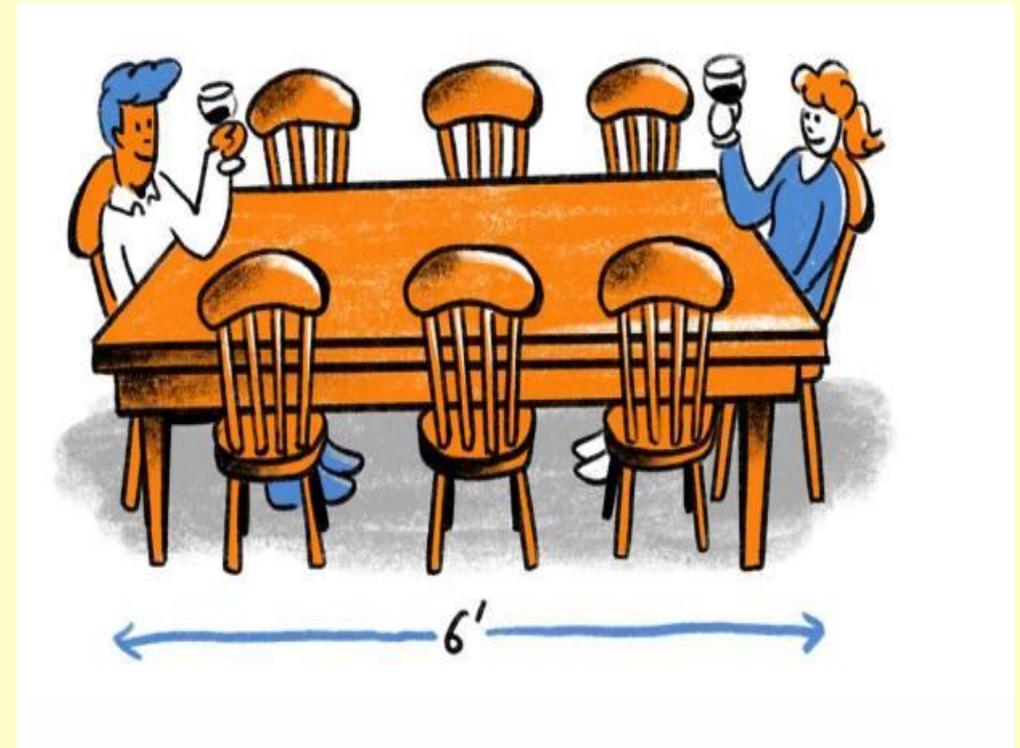

Once it is time for dinner, I will complete the following steps:

1. I will wash my hands

2. I will sit at my special seat and take my mask off

Once dinner is over we will all take turns, to get up from our special seats and complete the following steps:

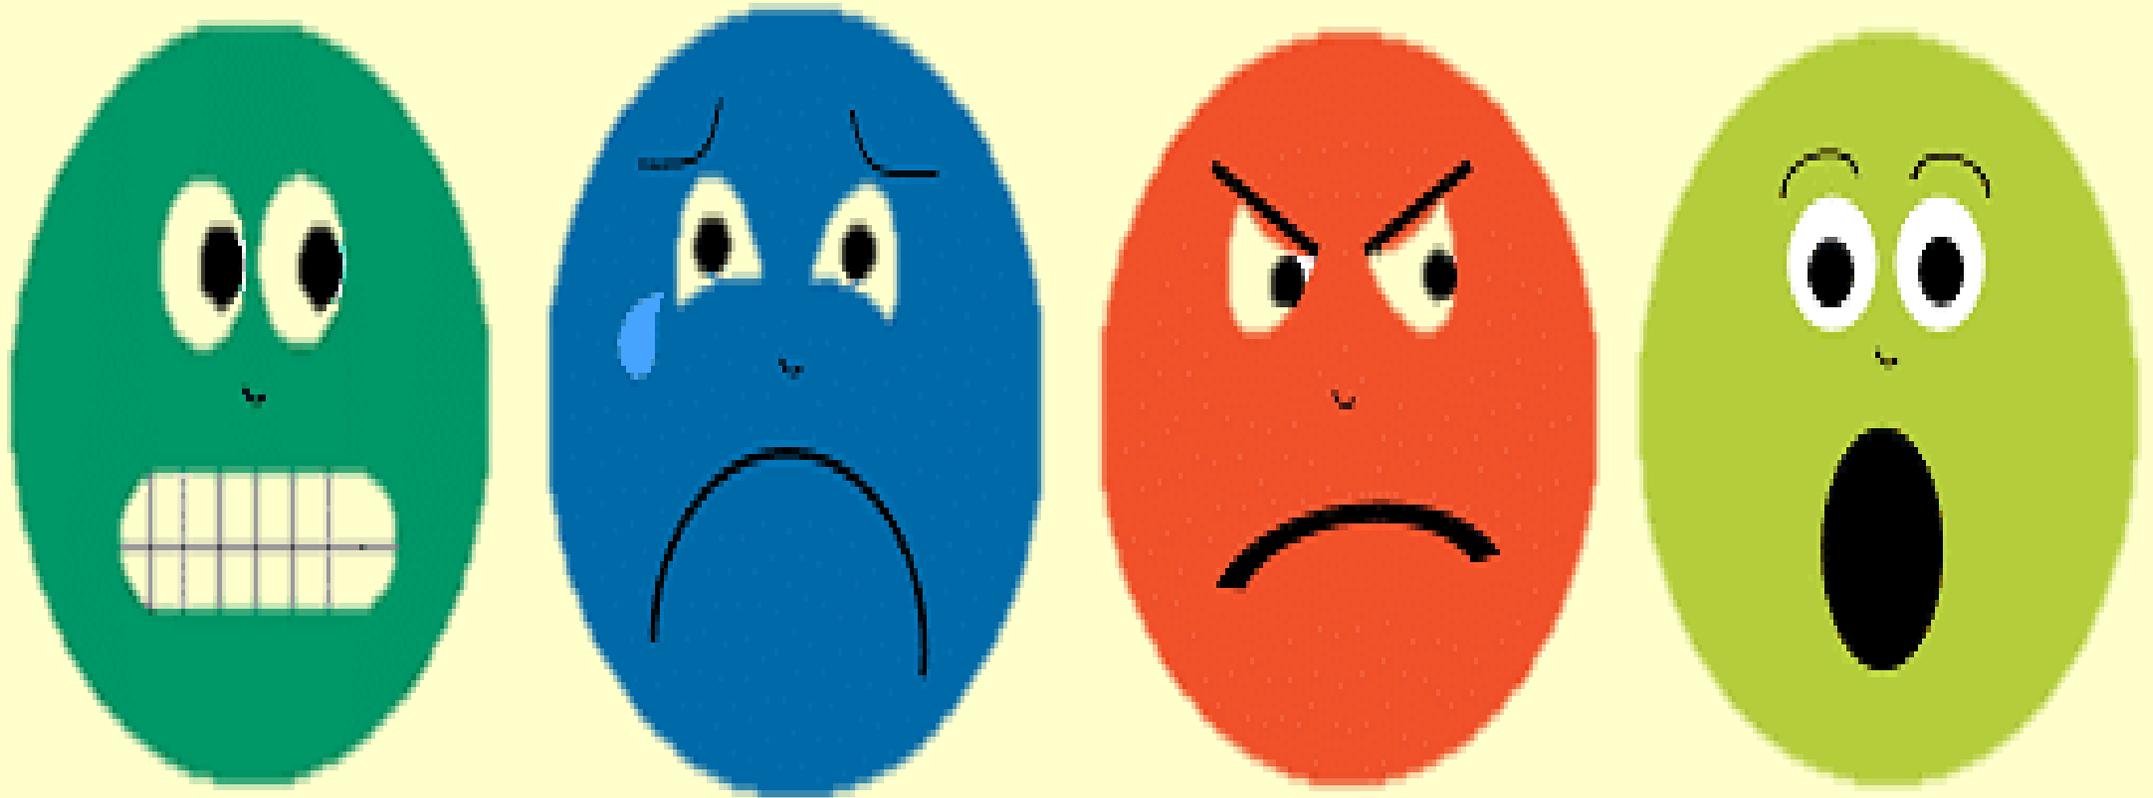

1. I will wash my hands

2. I will wear my mask again

I will feel different emotions with all these rules and restrictions around my family.

It is ok to feel these emotions, my staff and family will support me by listening to me and talking to me

At the end of dinner I will wave my family goodbye and they will go back home. I am happy to celebrate holiday dinner with my family.
