THE C.O.D.E. INITIATIVE

Creating Opportunities,
Defining Education

ABOUT US

At The C.O.D.E. Initiative, we believe that every child can code and that every child should have the opportunity to learn how to code in an environment that supports their unique learning needs. Our online workshops are open to all children. However, we have a focus on providing accessible workshops to children with exceptionalities and learning differences and/or children who might struggle in the traditional educational system.

Our expertise working with children with learning difficulties and our personalized style of teaching ensures that your child receives a supportive learning experience that is tailored to them and highlights their unique strengths and abilities.

We have **3+ years of experience** using an explorative approach to teach computer programming; Our method of teaching **prepares our students to be independent** and identify and solve problems on their own.

ONLINE WORKSHOPS

We recognize that every child learns at a different pace and has a different learning style. This is why our online workshops are highly personalized with super flexible schedules to cater to your child's unique learning requirements. We make sure that your child can learn at his/her own comfortable pace to ensure that they get a thorough understanding of all computer programming concepts covered in each lesson.

We offer online tutoring for the following workshops:
* Scratch Beginners
* Scratch Advanced
* Web development (HTML, CSS, JavaScript)
* Python
* Java
* AI & Machine Learning

Registration for our online tutoring workshops is currently open and seats are limited. To register for our workshops or to learn more about The C.O.D.E. Initiative, please visit www.thecodeinitiative.ca or contact us at info@thecodeinitiative.ca.
