Sound Exploration

Music

Connect ABILITY.ca

WHAT MAKES IT MEANINGFUL

Sound exploration allows participants to experiment with different instruments, objects, and materials to create sounds and rhythms. This activity promotes creativity, self-expression, and sensory awareness, while also supporting cognitive skills such as listening, sequencing, and concentration. Sharing sounds in a group fosters social interaction, teamwork, and confidence. Participants can feel pride in producing music, improvising rhythms, or creating unique sound combinations, making the activity both engaging and meaningful.

TIME

• 30–60 minutes

MATERIALS

- Percussion instruments (drums, tambourines, shakers, bells, xylophones)
- Everyday items that make sound (spoons, cups, plastic containers, water bottles with rice or beans)
- Scarves or ribbons for movement to music (optional)

Activity Title

- Music player for background music (optional)
- Visual cue cards or picture-based instructions (optional for sequencing or rhythm patterns)
- Mats or a designated area for instruments

INSTRUCTIONS

- 1. Set up instruments on tables or in a circle so participants can see and reach everything.
- **2.** Demonstrate how each instrument or item makes a sound.
- **3.** Encourage participants to:
 - Experiment with different instruments or objects
 - Try creating rhythms or patterns
 - o Combine sounds with others to create a "group orchestra"
 - Use scarves or movement to respond to music if desired
- **4.** Optional: Record the sounds or rhythms to playback for participants to hear and reflect on.
- **5.** Discuss or share favourite sounds, rhythms, or patterns as a group.

Activity Title

SUPPORTS NEEDED

- Guidance on how to hold or play instruments for those with fine motor challenges
- Demonstration of rhythms or patterns for imitation
- Visual cues for sequencing or turn-taking in group play
- Encouragement and positive reinforcement to experiment and be creative
- Assistance with setting up and cleaning instruments

OTHER THINGS TO NOTE

- Can be structured (e.g., follow a rhythm, create a song) or free-form exploration.
- Works well in small groups or individually to reduce overstimulation.
- Can be themed (e.g., nature sounds, seasonal instruments) to connect with learning goals.
- Group performances can be recorded or shared with family to celebrate creativity.
- Flexibility is key: participants can choose how much or how little they engage with each instrument.
