Title: The Diagnosis Of Pervasive Developmental Disorder (Somali Translation)

Description: General overview of some of the characteristics of Pervasive Developmental Disorder

Author: Toronto Early Childhood Translation Committee (C.L.T.)

Ku Sheegida Pervasive Developmental Disorder

In lagu sheego mid ka mid ah Pervasive Developmental Disorders oo uu ku jiro Autism Spectrum Disorder, ilmuhu waa in uu qabo tiro xadidan oo dabecadood oo sedexdan astaamood ah.

1. Dad Dhexgalka
2. Isgaarsiinta ama Hadalka
3. Akhlaaq

Ku magacaabida mid gaar ah waxaa lagu saleeyay khatarta dabecadahaas iyo cadadoodaba.

1. Dad Dhexgalka
 - Dayid aan caadi ahayn
 - Ka duwanaan iyo/ama dad dhexgelid yar
 - Wuxuu inta badan si wanaagsan ula xiriiri ogyahay dadka waawayn marka loo eego inta uu la xiriiro caruurta kale
 - Wuxuu ka helaa in uu waxyaabaha sameeyo asiga oo aan caawimaad ka codsan dadka kale
2. Isgaarsiinta ama Hadalka (hadal iyo hadal-la'aan)
 - Dib u dhac xaga luqada
 - Dhibaato in uu fahmo wixii loo diro
 - Dhibaato in uu bilaabo ama uu wado sheeko
 - Waxaa dhacdo in uu ku celceliyo erayo/hadal ay dadka kale yiraahdeen
 - Xadidaad xaga ciyaarta khayaaliga ah
 - Wuxuu ku helaa waxa uu rabo asiga oo qabanaayo qof wayn gacantiisa
 - Wuxuu isticmaalaa gacmahiisa si hadal ahaan ah
3. Akhlaaq
 - Wuxuu ku celceliyaa falalka, tusaale, intabadan wuxuu ku ciyaaraa farihiisa, wuu is ruxaa, wuu boodboodaa
 - Cayaar aan caadi ahayn, tusaale, wuu safaa alaabta lagu ciyaaro, wuxuu ku celceliyaa in uu wareejiyo alaabta lagu ciyaaro
 - Dhibaato xaga isbedelka ah, wuxuu ka helaa in wax walba ay sidoodii ahaadaan
 - Dareen aan caadi ahayn xaga dhawaaqa, urta, dhadhanka, taabashada ama dareenka araga

La soco: Tani waa war good ahaan ah, waa in ay la socoto warbixin badan oo tifatiran.
